## Experience

---

### DOT Digital Group

Remote

Mobile Developer

Apr. 2024 - Current

- Implemented message streaming in the chat functionality.
- Integrated the device's voice recognition with React Native.
- Implemented an audio response queue, significantly improving the minimum response time.

### Amplimed

Chapecó - SC, Brazil

Mobile Developer

Apr. 2022 - Apr. 2024

- Responsible for gathering requirements, architecture, and development of the company's new application.
- Optimized the process of creating and building white-label applications, reducing the total time from approximately one day to just a few hours.
- Integrated the main application and its white-labels with Bitrise and XCode Cloud CI/CD, significantly reducing the time to release new updates.
- Together with the UX team, I considerably improved the user experience with clearer flows, animations, and tips.
- Impacted the development sector in general, serving as a technical reference for the mobile and front-end teams, and guiding new members in the company's projects and workflows.

### D3T Inovação Tecnológica

Concórdia - SC, Brazil

Mobile & Full Stack Developer

Feb. 2021 - Mar. 2022

- Assist in the development and maintenance of e-commerce platforms with Laravel and Vue.js.
- Responsible for the development and maintenance of a React Native application for a Smart POS machine.
- Developed a Native Module in Java for full integration with the PagSeguro PlugPagServiceWrapper SDK.
- The Smart POS application has been very successful and is present in various festivals and events throughout Brazil, especially along the coast of Santa Catarina.

## Skills

---
